Bekasi, Indonesia

Information Systems graduate from Atma Jaya Yogyakarta University with a strong interest in data-driven operations, procurement, and administrative support. Skilled in Excel, SQL, Power BI, and Tableau, with hands-on experience managing, analyzing, and presenting data to support decision-making. I also bring experience in organizing and coordinating tasks from my involvement in various student-led projects and events. Known for being detail-oriented, adaptable, and eager to contribute to both analytical and operational functions in a dynamic work environment.

Education

BACHELOR OF COMPUTERS – Atma Jaya Yogyakarta University – Yogyakarta, Indonesia   August 2024
Majors: *Information Systems, 3.82/4.00*

Skills

- **SQL** (MySQL, BigQuery)
- **Excel** (VLookup, Conditional Formatting, Pivot Table)
- **Python** (Basic Proficiency)
- **Power BI**
- **Google Data Studio**
- **Tableau**

Projects

BANK MARKETING ANALYSIS – Personal Project **–** Indonesia   December 2024

- Utilized SQL to extract and analyze data related to direct marketing campaigns for a Portuguese banking institution.
- Conducted data cleaning and exploratory data analysis to gain insights about the marketing performance
- Visualized the data by using **Tableau to** compile a professional report

LONDON BIKE SHARES DASHBOARD – Personal Project **–** Indonesia   November 2024

- Utilized **SQL** to extract and analyze historical data from London bike sharing datasets
- Transformed and processed client data using SQL to ensure data completeness and validity
- Loaded and visualized data with **Tableau** to compile an impactful visualization to help predict the future bike shares

WORLD LAYOFFS EDA – Personal Project **–** Indonesia   October 2024

- Utilized **SQL** to analyze more than 2000 records in a dataset containing information about layoffs in a company
- Worked on cleaning the dataset to remove inconsistencies, handle missing data, and ensure data quality
- Analyzed the data by applying aggregation techniques, filtering criteria, and using Common Table Expressions (CTEs) for simplifying complex queries
